

Objectives of the Hearings: To present evidence that the U.S. government's official investigation into the events of September 11, 2001 is seriously flawed and has failed to describe and account for the 9/11 events.

The Hearings are not in themselves a new investigation, but rather a gathering and presentation of the evidence collected over the last 10 years showing that the government account is incorrect and that a new investigation is needed to fully explore the lines of evidence presented.

TVNL Comment: Regardless of the outcome of these hearings, the American public only believes what the establishment media tells them to believe. Reality has no effect on Americans.
