

Ray Nowosielski and John Duffy, the producers of the popular 9/11 documentary '9/11 Press for Truth', were contacted by the CIA last week on September 8th regarding extensive research, interviews and findings that have led them to discover the identities of two key CIA analysts who were instrumental in the conspiracy.

The film's producers initially only referred to the CIA analysts by their first names, but expressed their intention to later reveal their full identities in a forthcoming "investigative podcast", which seemingly prompted the agency to step in.

Duffy and Nowosielski also interviewed former counter-terrorism czar Richard Clarke, who told them on the record that he has intelligence that three former top CIA officials – George Tenet, Cofer Black and Richard Blee – knowingly withheld key information on the alleged hijackers from the White House, the FBI, Immigration and the State and Defense Departments.
