

The FBI has uncovered another FBI-created terrorist plot in the DC Area today, this time ending with the arrest of an unnamed Moroccan-American in his 30's, apparently the only non-FBI agent in the entire scheme.

The FBI says the operation was a "lengthy and extensive" one, and their agents pretended to be members of al-Qaeda, furnishing the arrested man with a phony suicide vest they had created and told him to attack Capitol Hill with it.

TVNL Comment: Do some research about the first WTC bombing...you will see that the scheme was hatched by the FBI. The perps were recruited by the FBI and the explosives were supplied by the FBI. Nice country we live in...especially one where this information is public but the public does not care.
