

Here's some news for those who still somehow believe the political left in Washington cares about the People. After U.S. Senator Rand Paul introduced an amendment that would have ended armed FDA raids on raw milk farmers (http://www.naturalnews.com/035966_Rand_Paul_FDA_censorship.html) and legalized free speech about the curative properties of medicinal herbs, nutritional supplements and superfoods, are you curious how many Democrats voted in favor of this?

Every single Democrat in the U.S. Senate believes that telling the truth about the beneficial effects of Chinese Medicine, or medicinal herbs, or nutritional supplements should be a crime that can also get you raided, shut down and imprisoned by the FDA. There is not a single Democrat who sees anything wrong with the government sending herbal product formulators to prison. There is not a single Democrat who believes that an Amish farmer has the right to milk a cow and sell that milk to their neighbor without being threatened by the government.

This is an astonishing milestone in U.S. history. When those in Washington who pretend to represent the People openly and publicly vote to crush the very liberties and freedoms they claim to protect, you no longer have a real Democracy. You have a police state.
