

Every country is tired of war except for the US. War, including nuclear war, is the neoconservative strategy for world hegemony.

The entire world, except for Americans, knows that the outbreak of armed conflict between Russian and Georgian forces in South Ossetia was entirely due to the US and its Georgia puppet, Saakashvili. Americans, alone in the world, are unaware that the hostilities were initiated by Saakashvili, because Bush, Cheney and the Israeli-occupied American media have again lied to them.

No doubt the Bush Regime can con the American population, just as it did with Iraqi weapons of mass destruction, Iranian nukes, and 9/11 itself, but the rest of the world is not buying it, not even America's bought-and-paid-for European allies.
