

TVNL Comment: Here is a perfect example of suppressed reality. Suppressed by the people control our lives...and the media. Water can be used to power virtually everything on the planet. It would solve virtually all of our energy needs, our economic worries and many of our environmental problems. It would prevent wars and eliminate our dependency on foreign nations. But the people who make money on energy and war do not want you to know about this. This is why those people control the media, and do not let you know it exists.
