

Anderson-based Bright Automotive got attention from the media, members of Congress and the administration when it unveiled today a hybrid electric vehicle capable of achieving 100 miles per gallon.

**TVNL Comment: And 150 MPG cars have been around for quite some time...but the public is not allowed to know this because the auto industry conspires with the energy industry to rob you blind! Water powered engines have been around since the 60s....andf you can bet your life you will not see them sold in our lifetime...unless "we" win!**
