

If the Finance Minister really wants to know the depth of this "global economic firestorm", all he has to do is to ask the people who created it.

About 150 of the world's most influential powerbrokers in government, industry, banking, media and academia are meeting from May 14 to 17 at the Nafsika Astir Palace Hotel in Vouliagmeni, Greece.

This group is called the Bilderberg Group and operates under the Chatham House rules -- meaning that no details of whatever has been discussed can ever be leaked to the media.

It seems, however, that top of their agenda this year is whether to have a prolonged depression that dooms the world to decades of stagnation and poverty or an intense short depression that eventually leads the way to a sustainable economic world order.

Bilderberg could also be fostering a false picture of economic recovery, encouraging people to invest in stocks and shares again only for them to lose their money as another massive downturn is created by an economic false flag operation.

It is frightening that decisions made by this non-elected cabal can affect every citizen in the world today.
