Imbascini said he **amputated the genitals of one or two men every day.**

"I walk into the operating room and the general surgeons are doing their work and there is the body of this Navy SEAL, which is a physical specimen to behold," he told IPS. "And his abdomen is open, they're exploring both intestines. He's missing both legs below the knee, one arm is blown off, he's got incisions on his thighs to relieve the pressure on the parts of the legs that are hopefully gonna survive and there's genital injuries, and you just want to cry."
